The image shows two overlapping screenshots of the Google Scholar interface. The background screenshot shows the main menu with options: '내 프로필' (My Profile), '내 서재' (My Bookshelf), '알리미' (Alerts), '통계' (Statistics), '고급 검색' (Advanced Search), and '설정' (Settings). The '설정' option is circled in red with a star icon. The foreground screenshot shows the '설정' (Settings) page. On the left sidebar, the options are: '검색결과 언어' (Search Results Language), '라이브러리 링크' (Library Link), '계정' (Account), and '브라우저 확장 프로그램' (Browser Extensions). The '라이브러리 링크' option is circled in red with a star icon. The main content area is titled '다음 라이브러리 액세스 링크 표시(최대 5개 라이브러리까지 선택):' (Display the following library access links (select up to 5 libraries)). Below this is a search box containing '대구대학교' (Daegu University) and a blue search button. Below the search box, there is a list of libraries with checkboxes:

- ☒ 대구대학교 - Find it @ DGU
- ☐ RISS4U 종합목록 - Find it @ RISS
- ☐ Daegu Haany University - Find it @ Daegu Haany Univ

 The first checkbox is circled in red with a star icon.

Journal Impact Factor

The Journal Impact Factor (JIF) is a journal-level metric calculated from data indexed in the Web of Science Core Collection. It should be used with careful attention to the many factors that influence citation rates, such as the volume of publication and citations characteristics of the subject area and type of journal. The Journal Impact Factor can complement expert opinion and informed peer review. In the case of academic evaluation for tenure, it is inappropriate to use a journal-level metric as a proxy measure for individual researchers, institutions, or articles. [Learn more](#)

03 有用的网站

03 有用的网站(中国资料)

中国代表学术数据库

CNKI (中国知网, China National Knowledge Infrastructure)

<https://www.cnki.net/> 中国最大的学术资料数据库，提供论文、学位论文、学术期刊、会议记录、报纸等

WanFang Data (万方数据)

<https://www.wanfangdata.com.cn/> 包含中国政府机构及研究机构提供的学术资料、论文、专利、研究报告等

CQVIP (维普, Chongqing VIP Database)

<http://www.cqvip.com/> 包含学术论文、学位论文、研究报告的大型数据库

可免费使用的学术资料网站

百度学术 (Baidu Scholar)

<https://xueshu.baidu.com/> 中国版的Google Scholar，可以搜索各种学术论文和研究资料

国家哲学社会科学文献中心 (National Philosophy & Social Sciences Literature Center)

<http://www.ncpssd.org/> 提供哲学及社会科学领域的学术论文和研究报告

中国科学院文献情报中心 (CAS Library, Chinese Academy of Sciences)

<http://www.las.ac.cn/> 提供自然科学及工程相关的学术资料

03 有用的网站(PubMed)

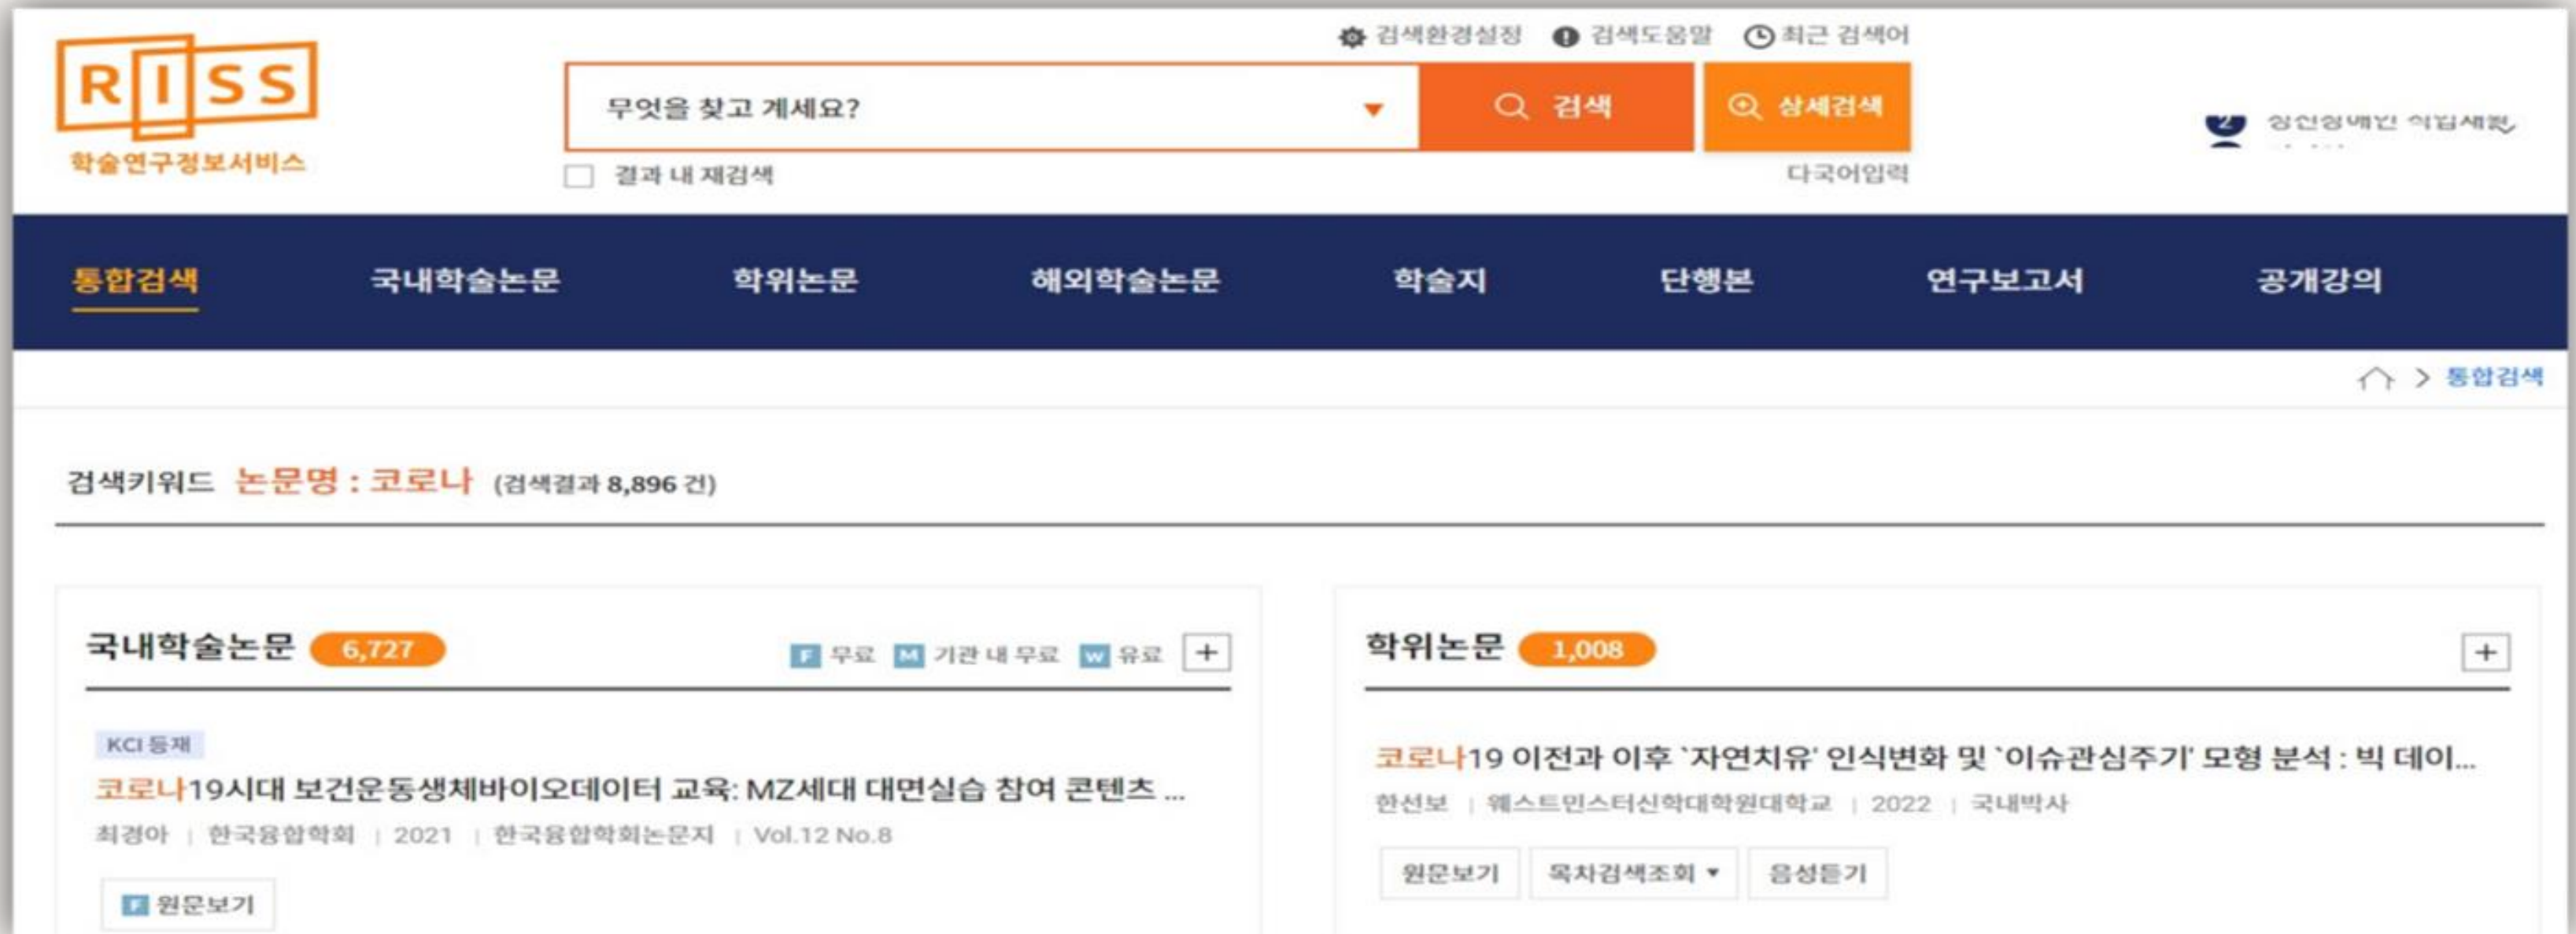

The screenshot shows the PubMed homepage with a dark blue header. The PubMed logo is in the top left. Below it is a white search bar with a green 'Search' button. Under the search bar, the word 'Advanced' is written. A paragraph of text describes PubMed's content: 'PubMed® comprises more than 37 million citations for biomedical literature from MEDLINE, life science journals, and online books. Citations may include links to full text content from PubMed Central and publisher web sites.'

Below the text are four main sections, each with an icon and a title:

- Learn** (Icon: head with lightbulb):
 - About PubMed
 - FAQs & User Guide
 - Finding Full Text
- Find** (Icon: magnifying glass over a molecular structure):
 - Advanced Search
 - Clinical Queries
 - Single Citation Matcher
- Download** (Icon: downward arrow):
 - E-utilities API
 - FTP
 - Batch Citation Matcher
- Explore** (Icon: globe with mouse cursor):
 - MeSH Database
 - Journals

03 有用的网站(RISS)

- 由教育部下属机构韩国教育学术信息院提供的学术研究信息服务
- 可以搜索约147,000种国内外学术期刊的书目及原文
- 可以全面搜索国内学术期刊信息

03 有用的网站(ScienceOn)

- 由韩国科学技术信息研究院 (KISTI) 提供的科学技术门户网站（原NDSL）
- 可搜索7,500万篇论文、国家研发信息、研究数据和信息分析服务
- 可以搜索韩国国内订阅的电子期刊，但仅能访问我们大学订阅的电子期刊的原文

03 有用的网站(研究报告)

研究报告: 描述对特定主题或问题进行系统记录和分析结果的资料

学术研究报告

包含大学或研究机构进行的学术研究结果的报告

例如, 为提高大学的教学质量而进行的海外政策及趋势研究

PRISM(政策研究管理系统) RISS(学术研究信息服务)

产业研究报告

包含企业或产业进行的研究结果的报告

Occupational stress, burnout, and job satisfaction amongst Spanish speech-language pathologists.

International Journal of Speech-Language Pathology

PURPOSE The current research aimed to determine the prevalence and the relationships between perceived stress, burnout, and job satisfaction among practicing speech-language pathologists (SLPs) in Spain. In addition, their perspectives and experiences related to their job were explored. **METHOD** A mixed methods research design was used with cross-sectional quantitative and qualitative methodology. Four hundred and thirty-eight SLPs completed the Perceived Stress Scale, the Maslach Burnout Inventory, and the Font Roja Job Satisfaction Questionnaire in order to report perceived stress, burnout, and job satisfaction, respectively. Ten SLPs participated in semi-structured interviews. **RESULT** With respect to stress, 61.6% of SLPs reported a moderate level of stress and 18.7% reported a high level of stress. With respect to burnout, only 7.56% of the participants met the criteria commonly used for its diagnosis. However, 45.2% of SLPs reported a high level of emotional exhaustion, and 52.7% expressed a low degree of personal accomplishment. Job satisfaction was average for 94% of SLPs and high for just 1% of participants. The level of job satisfaction was significantly related to job stress, emotional exhaustion, and depersonalisation. Qualitative content analyses produced themes and subthemes regarding work recognition, relationships with people in the workplace, work conditions, and job control. **CONCLUSION** A noteworthy percentage of SLPs reported emotional exhaustion and reduced personal achievement. Findings suggest that strengthening job control and social support might become protective factors to avoid the full development of burnout, which should impact positively on an individual's wellbeing and, in turn, the quality of the services provided.

Well-being, job satisfaction, stress and burnout in speech-language pathologists: A review

International Journal of Speech-Language Pathology

Abstract Purpose The purpose of this review was to evaluate the factors that influence well-being, job satisfaction, stress, and burnout in speech-language pathologists (SLPs), and to identify the impact of these variables on worker recruitment and retention. **Method** A systematic literature search was conducted. Four electronic databases (PsycARTICLES & PsycINFO, PubMed/Medline, CINAHL and ABI/INFORM) were searched. The search was limited to articles published in English between 1998 and June 2018. To be eligible for inclusion, studies needed to investigate or report well-being, job satisfaction, stress or burnout in SLPs. The methodological quality of each paper was assessed using the "Strengthening the Reporting of Observational Studies in Epidemiology" (for quantitative data) and "Consolidated criteria for Reporting Qualitative research" (for qualitative data) checklists. A data-driven thematic analysis of the literature was used to identify key themes. **Result** Seventeen of 2050 studies met the inclusion criteria, of which 15 were cross-sectional surveys yielding quantitative data. Two were qualitative studies. There was consistent evidence for SLPs in the USA and Canada experiencing average to high satisfaction in their jobs. However, SLP job satisfaction in the UK was low, and studies in other countries did not address satisfaction. Facet analysis revealed six contributory themes, three of which were clearly associated with well-being: workload/caseload size, professional support, and salary. The contribution of job control (autonomy), length of time in practice and work setting was inconclusive. Evidence for stress and dissatisfaction leading to workforce attrition was found. **Conclusion** Job satisfaction, stress, and burnout were found to be associated with various occupational features, including elements of demand, support and reward. No previous studies have investigated the interaction between different elements of a job, which might boost satisfaction or ameliorate stress in SLPs. This is the first review using a systematic approach to focus on well-being, satisfaction, stress and burnout in SLPs and suggests more work needs to be done to help identify and improve the well-being of the workforce.
